No dear this is not a web rat. This is windows rat setup inside rdp. It doesn't require port forwarding. Kill windows defender permanent and also bypass all antiviruses. Best RAT for spreading

hahahahahaha oh god, here we go

I urge anyone and everyone to use a middleman when conducting business with this user. He is claiming quite literally 0 day functionality for mere cents. Use your judgement or discretion but there is a full range of Escrows in our Service Offerings subforum on HF. Please do not use an offsite middleman unless explicitly trusted from verified sources.

MadScientist - October 10, 2025, 9:22 am

It says FUD/bypass all AV but your own scan shows detection's?

Dude, inserting a payload into an image is easy ... if you don't care whether it works or not.

I've heard of this guy's website. He sells sketchy cracked malware. For that alone he should be banned. Also, only skids and scammers refer to RATs as 'viruses'.

Demos mean little. It could say more about video creating skills than anything.

I guarantee that there is nothing about this RAT that avoids the need for port forwarding since it's self-hosted.

It bypasses Windows Defender because it disables it in registry if Tamper Protection has already been turned off after bypassing UAC.

All AV Means Nearly All Antiviruses That Not Means Every Antivirus. First Check Demo And Then Post Negative Comments.

Are you only KGB in the world?

HerrWinston - October 14, 2025, 1:18 pm

Good Sir, your advertising a tool that is NOT yours, please stop with doing this. Taking your website out of your signature wasnt really helping you either, I have reviewed many things, for the past 2 hours ;(and can confidently say that you are not the publisher of the KGB Rat.

The official owner of this Rat has for example published this on september 24. on your website it quite literally tells us you published on october 1.

To anyone thinking of buying here, i would strongly advice to look further, this is just a shit show, wish you all a nice evening :)

A little shoutout for [Binance](#) and [MadScientist](#) calling you out so early on, hopefully the users on here used atleast a middle man when buying cracked copies

[HerrWinston](#) [Binance](#) and [MadScientist](#) keeping the forum safe, gg guys.
