Thread: [What's your favorite subject of interest and why?](#)

RangoWorld - October 9, 2025, 1:16 am

Plenty of people here might be done with school but often we stick to or rediscover a subject or two that we like the most.

What are those subjects that you still love and like to study?

For me. It's Physics and Computer Science.

Bastille - October 9, 2025, 1:39 am

I was never really a good student — I hated school when I was younger — but I went back at 24 to study computer science, so I'd say the subjects related to computing.

Nice. Would you say you were a good Math student?

Yanix - October 9, 2025, 1:46 am

Nice choices! Physics and Computer Science are really interesting fields. For me, it's Law and Psychology. I love understanding how rules shape behavior and society.

Psychology is really interesting. I forget to mention. That's one of my primary fields of interest and sometimes for work too. Lol

I was during elementary school, I was able to compute really fast, but at middle school I've lost the track

Yanix - October 9, 2025, 1:56 am

Psychology never gets old because people are endlessly complex. It's cool that it's part of your work too. You probably see human behavior from a whole different angle!

aj33b9009 - October 9, 2025, 9:55 am

For me, I love mathematics.

Oh_Well - October 9, 2025, 9:58 am

I think science got way more excited after school, when you realize how much you can do with it

except lame school experiments or simple theory

Jamika - October 9, 2025, 9:19 pm

I like science subjects in general, but I especially enjoy biology — that particular field really interests me.

RangoWorld - October 10, 2025, 12:20 am

Interesting. I don't think I've heard someone say they enjoy Biology the most here.

What got you into it? And do you plan on becoming a Doctor?

Jamika - October 10, 2025, 2:24 am

I love the mystery about live and living animals and human

In fact, I actually graduated back in 2009 — from the Faculty of Veterinary Medicine.

Sounds great. Do you work in some capacity with animals now?

Jamika - October 10, 2025, 1:15 pm

No no ?, work in a pharmaceutical company, human related, so away from animal field

kinnu543 - October 10, 2025, 6:13 pm

For me it is science, I have scored good marks in science during school days

Lefty - October 10, 2025, 6:14 pm

I have always loving coding, but that TEMPLE OS by Terry is one of the most fascinating things I have ever seen.

sharn - October 11, 2025, 11:00 am

I love math because it is pure and never lies.

Either you are right or you are wrong.

RangoWorld - October 11, 2025, 12:23 pm

(Oct 11, 2025 11:00 AM)sharn Wrote: [\[CITE\]](#) I love math because it is pure and never lies.

Either you are right or you are wrong.

Clear cut. I like your reasoning.

Would you say you are then a very logical person when it comes to making life decisions?

sharn - October 11, 2025, 12:27 pm

Yes, I rely on logic more than emotion. It keeps things clear.

What about you?

RangoWorld - *October 11, 2025, 1:59 pm*

(Oct 11, 2025 12:27 PM)sharn Wrote: [\[CITE\]](#) Yes, I rely on logic more than emotion. It keeps things clear.

What about you?

I try to. But Math is not my favorite subject.
