Bitwise 'not playing' as it proposes low fee for its Solana ETF

Bitwise is seemingly already moving to undercut other issuers with its Solana Staking ETF, proposing an annual fee of just 0.20%.

That's a solid fee for an ETF. Not bad actually.

I'm not into ETFs and stocks so I have nothing to compare it to but I agree, it does seem really low which is great. The APY on SOL staking right now is what, 6–8%? Then a 0.2% fee for institutional as well as non tech savvy investors seem fair. Most CEXs doing custodial staking take way more than that.
