How many browser tabs do you have open? Right now I only have 2. This, and Cookie Clicker. 10.886 septendecillion cookies Baby! But when I am coding or doing something where I have to look stuff up then I might have like 10-15 tabs open at a time. How about you? Also, do you have any pinned tabs? I don't right now.

I currently have two browser tabs open at the moment. One is the Google page for a local smoke shop and the second one is this one. I try not to have too many open at the same time.

I'm using a lot of different browsers due to developing things.

But I can't imagine having either 18 or 24 tabs like users above wrote, that would be stressful to me.

Main browser I have max 5-6 tabs open a time.

Normally when on Chrome I open 20-30. After that it starts to effect performance

I try to keep them low.

Computer ideally under 10. Phone, that's a different issue

I click on stuff that I don't want to lose but don't make time to read or finish what I'm doing with them. I try not to count my tabs.

I tried to keep under 100 tabs on my phone, but that's a lost cause now.

With that question, you have awakened ancient demons, brother ?

My answer to your question is: a lot of open tabs. I can't tell you exactly how many, but considering that I have 128 GB of free RAM, you can imagine how many there actually are ?

If im hard at work than maybe about 8-10.

But casually on my phone I keep 3 tabs open always

sharn - *October 11, 2025, 11:57 am*

12 tabs. Most are news sites I keep checking.

Currently have 11, but sometime have like thirty. I'll start closing tabs whenever tabs become so small I cannot make sense of what a tab is.
