Thread: [Best way to calculate % left for Octoberfest 2025](#)

Yin Yang - October 10, 2025, 6:07 am

Is there a tampermonkey/script out there? I kind of wish it was broken down further into knowing how many threads and posts I needed left.

As per chatGPT (openAI):

Quote:? Your goal:

500 posts

30 threads

? Total goal = 530 total items

? Your current progress:

33% of 530 =

$0.33 \times 530 = 174.9$? 175 total items completed

So you've done around 175 posts/threads combined so far.

Now, since October has 31 days:

10 days have passed -> roughly 1/3 of the month.

You're also at 1/3 (33%) progress, which means...

? You're exactly on pace — if you keep the same posting rate through the rest of October, you'll hit your goal by month's end.

Yes, Charlie Sheen posted a tampermonkey script in coders lounge. It works great for me.

Edit: I'm not going to make it, but that's OK. My goal is to get to 50 right now.

I used chatgpt for that do , so it tell it post and threads and he tells me everything

Was fun ngl

Deany - *October 10, 2025, 5:21 pm*

I think got 80 posts left. Kill me
