Thread: [Cryper For Spam](#)

periodoinicio - October 10, 2025, 12:03 pm

Can someone with a good knowledge of how to help me buy the best crypter for mass spamming? Please.

Can you explain what you mean?

Are you wanting to crypt a file to then send via mass spam?
Or are you asking to send encrypted emails?
Or are you wanting to crypt a program that can launch mass spam from a server?

Your question can be interpreted in a few different ways.

periodoinicio - October 13, 2025, 6:56 am

I want a crypter to do mass spam

DeathPenalty666 - October 13, 2025, 7:23 am

you want to crypt your payload to spread via mass mailing? you need crypting with pdf,doc,xll,lnk,url,xss or something like that right away... good luck

I can crypt one file for you, for free, with private stub, just to share my work, I will create post soon and count with your feedback..

Can you start a contract with me?

You should not send infected or malicious executable files via email.

I think buddy is looking for a rat? I don't know for sure what he means exactly.

Tyr - October 16, 2025, 2:03 pm

I am also confused.

Yeah... can't tell if OP wants to crypt something to spam it out, or crypt something that can launch spam campaigns from machines, or something else...

it out, or crypt something that can launch spam campaigns from machines, or something else...
Clearly, he is a crip.
