Thread: [What was your worst cryptocurrency investment?](#)

Pimping - October 10, 2025, 11:22 pm

Mine was any ICO i bought in 2017-2018
lost money on pretty much all of them. what about you guys?

Yanix - October 11, 2025, 12:10 am

Honestly, \$TRUMP is my biggest regret when it comes to crypto investments.

MANA, in 2021 during the Metaverse hype, lost 90-95%, few hundreds of dollars, but I rather prefer to keep it than selling at this point. With the hope that the Metaverse will regain more attention with AI and Smartglasses

Oof, I definitely made some bad calls back in 2018-2019. Most of the ICOs I jumped on tanked, but at least it taught me to be way more careful now.

FuckElon coin by Logan Paul. Unfortunately I was victim of his pump and dump scheme and I ended up looking like a dumb fuck.

I thought I could ride this pump before the rug pull. First noob mistake.

Though I learned my lesson well then.

ETH

I've spent enough money on ETH gas fees to re-build the twin towers.

that's good that you learned your lesson.

I always avoided the memecoins, almost regardless.
I have bought a few meme-but-almost-not-a-meme coins like DOGE and Shiba in the past, but not for years. I made money when they pumped and then got out (not at their best highs, but before the dumps).

Where do you find new coins/tokens/etc these days Rango?

Omniscient - October 11, 2025, 3:38 pm

Radix for sure. Lost maybe \$75k total. Still pretty bitter about it.

jcole - October 11, 2025, 3:43 pm

My worst investment was DOT, Polkadot.

Yin Yang - October 11, 2025, 5:46 pm

30 K on Fideum lol. Idk what I was thinking bro

Mewtwo - October 11, 2025, 6:11 pm

XRP.

I lost \$10k from that. Only because of greed. I joined a pump group thinking XRP will go above \$1. I joined in at 46 cents. It went around 84 cents. Could've cashed out. But got dumped tf out back to 26 cents

Braco22 - October 11, 2025, 11:55 pm

\$TRUMP, got in at \$71, sold at \$28. \$AZERO, got in \$0.60 rode it all the way to \$3.30 and sold @ \$1.20 (essentially not a negative investment).

Plague - October 12, 2025, 10:03 pm

Took a big hit on DOT and didn't cash out when it blew up to \$50. The opportunity was there and I missed it

Lyrarei - October 13, 2025, 2:12 am

I already recovered but Radix definitely hurt me the most. I honestly didn't expect for it to drop down that much.
