Google Mandiant Probes New Oracle Extortion Wave Possibly Linked to Cl0p Ransomware

Google Mandiant and Google Threat Intelligence Group (GTIG) have disclosed that they are tracking a new cluster of activity possibly linked to a financially motivated threat actor known as Cl0p.

The malicious activity involves sending extortion emails to executives at various organizations and claiming to have stolen sensitive data from their Oracle E-Business Suite.

"This activity began on or

Interesting read, if they were at all successful it means that you don't even need to hack into their infrastructure and steal data to extort them.

You just bluff really hard and say you have it and demand money lol.

It all depends on the times. What do I mean?

SE is unpatchable. If that highly trained employee is in a bad day, gg wp
