ThreatsDay Bulletin: CarPlay Exploit, BYOVD Tactics, SQL C2 Attacks, iCloud Backdoor

From unpatched cars to hijacked clouds, this week's Threatsday headlines remind us of one thing — no corner of technology is safe. Attackers are scanning firewalls for critical flaws, bending vulnerable SQL servers into powerful command centers, and even finding ways to poison Chrome's settings to sneak in malicious extensions.

On the defense side, AI is stepping up to block ransomware in real

hackers are hitting cars, clouds, and even browsers, while AI is trying to fight back.

It's a war between attackers and defenders, and it all comes down to people staying alert and not falling for tricks.

Good lord screen mirroring the car? Or the users using the wifi. That is a weird one

leste - October 30, 2025, 5:10 pm

No corner of technology is safe. Everything from CarPlay Exploit to SQL C2 is getting hacked.

Hackers will be hitting smart homes and doing fingerprint less robberies pretty soon.

Automation robots will be loading your stuff in their auto driven cars
