Thread: [WinRar 0Day Exploit](#)

seoblackhatg - October 11, 2025, 10:02 pm

I have access to WinRar 0Day Exploit.

You can put any .exe file or .bat etc to the .rar file but it can't be seen when the rar is opened. And after extraction the file goes to startup folder so next time user restarts computer the file will automatically execute silently.

You can also add any decoy file's inside the .rar.

PS. Not sure why my last post got deleted

XDDDev - October 12, 2025, 7:14 am

i released this for free on a thread of mine, retard alert its public

I made a builder for this, works if drag & drops, extracts or running any file inside the rar. No need to know the windows username

Likulikubill - October 19, 2025, 8:35 am

Does it work whit the current winrar version?

Hendrex1 - November 20, 2025, 4:31 pm

You got any other RCE that works fine for cheap? dont mind paying for it tho.

noface33 - November 26, 2025, 12:19 pm

i need this pls, how can i get it
