Thread: [What do you think is the best programming language?](#)

violentwhy - October 12, 2025, 3:43 am

What do you think is the best programming language?
Another question.

RangoWorld - October 12, 2025, 3:49 am

I personally liked C# and now I think Python is great

Bastille - October 12, 2025, 3:50 am

Depends on what you want to do, C/C++ probably the best in general

DramaKing - October 12, 2025, 4:26 am

BASIC

PhillyStyle - October 12, 2025, 4:39 am

I don't think there is such thing as a best programming language. I like C# a lot right now but it doesn't have pointers unless you enable unsafe code, and it isn't compiled natively so it has drawbacks. C is great but for large projects it is a little too unstructured. C++ went and got it's self almost too structured. Lots of people program C++ a lot like C and don't use all the features of it. I think that is a reasonable approach to take. That is just scratching the surface. Other languages are great too but they all have drawbacks. Let's bring back Visual Basic!

Lyralei - October 12, 2025, 5:00 am

It might not be the fastest (far from it even), but Python is just the best for creating stuff fast, on the go and also flows the best in terms of just readability. Python can also always almost do everything other language can do, just a bit worse. It's the jack of all trades.

aj33b9009 - October 12, 2025, 6:05 am

I have the best language Python

Silkroad - October 12, 2025, 6:20 am

In my opinion, Python is the best all-around language. It's easy to learn, but powerful enough to do almost anything.

FrostMost - October 12, 2025, 1:24 pm

Python. A language that combines together everything u need. I would love to get my hands on C++ or Assembly when I am done with it though??????

HerrWinston - October 12, 2025, 1:35 pm

I love python, so my biased opinion is that Python is the best lang, right after is c++/c#

peldon - October 12, 2025, 2:46 pm

Python. What else ?!

webdev77 - October 12, 2025, 2:53 pm

(Oct 12, 2025 02:46 PM)peldon Wrote: [\[CITE\]](#) Python. What else ?!

Probably C if you want to actually be able to boot a computer and use python. Can't use python

without assembly or C being used first.
