Thread: [Penetration Testing by Experienced Red Team Professional](#)

???????? - October 12, 2025, 5:35 am

Hi people.

Do you looking for a pentesting service to your targets? As an experienced Red Team specialist and certified penetration tester, my area of expertise is offering thorough security evaluations that are customized to your particular requirements. I do give you detailed report about your targets in 24-48 hours. So we can discuss what we can do next to hack your target.

What I Provide:

Web application testing: Find weaknesses in your web platforms, such as CSRF, XSS, and SQL Injection, among others.

Network security evaluations: Examine both external and internal network architectures to find potential attack points, unpatched vulnerabilities, and configuration errors.

Application Security: Test all apps, APIs, and other components thoroughly to make sure your program is resistant to exploitation.

Active Directory & Enterprise Assessments: Model sophisticated attack situations, including as lateral movement, AD enumeration, and Kerberos attacks.

What Makes Me Your First Choice?

Practical knowledge on how to get around enterprise-grade security measures like WDAC, JEA, and 2FA.

Proficiency with Red Team projects requiring the creation of unique tools and cutting-edge methods.

Reports that are easy to follow and contain useful remediation suggestions.

How I Operate:

First Consultation: Talk about your needs and objectives.

Reporting & Suggestions: Provide thorough results along with simple fixes.

If your target has not any vulnerability to hack them, then maybe we can build advanced strategies by creating APT-like social engineering operations by using latest malwares, phishing methods and so on...

Contact with PM.

Notes:

It takes usually 24 hours and another 24 hours to prepare a report about it. So, total wait duration is maximum 48 hours to get your report.

Service price range: \$500-\$1000 for per target.

Important Note: If I get access to your target, first I'll consider value of the finding and sell it to you (we can negotiate the price). If you don't want to purchase the findings, I'll keep my right to sell it in the forums to others whoever are willing to buy.

SkidPID - November 5, 2025, 4:38 am

Are you willing to work on retainer? I might be able to offer you steady work.

Unfortunately I won't be able to PM you just yet. I need to hit 25 posts.

But a bit about it, basically I can take care of the heavy lifting, I'd basically just need someone on retainer to do audits, and reports. I'm not greedy I'll pay very well relative to whatever we make.

I sent you a message

Gloria - December 2, 2025, 12:57 am

Hi, can we discuss it further?

I have some pentesting jobs needed to be done varying 750-1k\$ each
