Hi everyone, we all have that one gadget that makes life easier or more enjoyable. For me, it's my smartphone. I use it for work, entertainment, and staying connected.

What's your must-have tech gadget and why?

JoshAllen - October 14, 2025, 5:38 pm

Easily phone. I use it for everything and being able to stay in contact with friends/family is important.

My must-have gadget is my phone for sure. It keeps me connected to work, family and friends. Plus, it's great for music, movies, and random Google searches. ? It's basically my lifeline!

Facts If I had to choose between my computer or smartphone I think I'd have to go with my phone

Minus all the generic shit; my raspberry pi.

I have pi servers, a game machine and a dev machine.

But i have one specific pi that runs evilginx like tunnels. I focus this tunnel on scammers/ewhores.

Except pc/phone, I'd say earbuds, I feel like I use/need them more than I realize

Looks like the smartphone wins this one easily ? It's hard to imagine a day without it now. Work, entertainment, communication, everything's packed into one device. Though I have to admit, earbuds and gadgets like Raspberry Pi make life a lot more interesting too.

Aside from a Mobile Phone. I have to go with my earphones. It's an IEM. Super good sound quality.

Recently I went without a phone for 3 weeks. But I could still connect with close ones on my home computer. A pause from doomscrolling habits that I had on my phone was refreshing. So I don't think there's any tech gadget I can't live without. If I had enough money to go somewhere in the mountains or forest with my loved ones in a nice house, I wouldn't mind having no tech gadgets.

Nice choice! IEMs really make a difference, especially for music or podcasts. The clarity and detail you get is on another level compared to regular earbuds. Between which one are you using?

DAL-SHA - October 16, 2025, 11:53 am

i think its my phone , i can live without it temporarily but not permanently ..

FrostMost - October 16, 2025, 11:57 am

Laptop. I can go without a phone for a while but not without a laptop. Makes me insane??????

sharn - October 19, 2025, 10:20 am

My smartphone.

It keeps my life from turning into chaos.
