Oh yeah hell of alot of horror stories from marketplace

Do you make some decent money on ebay even though it takes 15% ?

You have to get paid through paypal as well with ebay right because they are connected ? Do they take fees as well ?

Aw cool a 30% margin on your products leaves a decent profit for a hobby and depending on what your selling you can scale it , i have seen some people make alot of money drop shipping the strangest things

Aw cool i remember reselling something random way back when and getting burned on both sides when they were connected

Eran - October 16, 2025, 3:42 am

Mainly to understand hacking / security concepts and for malware analysis like source code and so on. I'm not using it for programming, and sometimes I tried to setup servers (for example SIEM or other tools linked to cybersecurity) but it's not perfect yet.

Recently I've read somewhere "If it takes more than 5 minutes with ChatGPT, go manually".
ChatGPT should be used only for shorts tasks

Is it true that spotify is filling up with AI music now ?

Mix - October 22, 2025, 10:42 pm

My mind goes to youtube but I am sure there would be something similar that would be like youtube if I didnt have it.

Yup, Kinda sad tho. I was reselling AutoCAD licenses for fraction of the original price
I have around 200+ licenses still, cuz the old company I worked for ordered a ton of them, but turns out they were the wrong kind of licenses so the head of IT there just gave me a thumb drive with all the licenses. So I started selling them and I had only neutral and positive feedback from customers. But eBay just decided to ban my seller acc and because it is connected to my bank account I just cant make a new seller acc to start selling again.

The funny thing was that eBay admitted that I never had any negative feedback and my customers were happy but because their Ai "Detected" that there is around 4% chance I would be scammer they decided to just get rid of me.

(Oct 22, 2025 10:27 PM)Chorozon Wrote: [\[CITE\]](#) Is it true that spotify is filling up with AI music now ?

Absolutely. There is a lot of Ai artists, but apparently Spotify is actually starting to follow how many there are and possibly even do something about the problem.

Spotify itself acknowledges that it's removed ~75 million "spam tracks" over the past year, many of which were enabled by AI tools (mass created, short duration to trigger royalties, impersonations)

Weren't they caught creating it themselves or at least favoring because of alot of artists leaving ?

For me, it's the learning part. all the tutorials and open courses. It's amazing how much knowledge people share for free.

Yeah, I heard that too — wouldn't be surprised if there's some truth to it. Kinda feels like they're trying to fill the gaps left by the artists who dipped.
