Thread: [What tech skills do you plan to learn next year?](#)

onlineuser | D3RFER - October 16, 2025, 6:11 pm

I've learned a lot this year. even after being in the cybersecurity and programming field for over 10 years. There's still so much more to learn, and that's exactly what makes IT amazing, there's always something new to master.

Now that we're getting closer to the new year, do you have any goals for what you want to learn in tech next year?

I'll definitely be focusing more on hardware, tbh I never really been super interested in hardware itself, but I want to master as many subjects within tech as possible

Mix - October 16, 2025, 6:20 pm

I am looking into learning a new programming language, but I dunno what would be useful for me yet but I tend to find I need to learn a bit more of what I know now before jumping the gun.

Bastille - October 16, 2025, 6:45 pm

Same every year, I hope to dive into programming, thought either about Python or C/C++, but every time I try I feel that my brain is not wired for this

DAL-SHA - October 17, 2025, 10:55 am

Reverse Engineering , C# , C++ , mastering Python ?

sharn - October 18, 2025, 4:26 pm

I plan to get into AI model building.

It is the future of automation.

M?tt - October 18, 2025, 4:47 pm

Thinking about diving more into reverse engineering.

Palestine - October 18, 2025, 5:07 pm

def going to keep learning more about AI because as everybody knows its literally the future

plops - October 18, 2025, 7:17 pm

I plan also in dedicating some time in working on AI.

Yeah. I sometimes try to learn multiple things at once. Seems like the better solution is always to master one at a time.

It's worth it. Put your mind to it, and I am sure you can do it.

(Oct 17, 2025 10:55 AM)Dalsha Wrote: [\[CITE\]](#) Reverse Engineering , C# , C++ , mastering Python

?

Reverse engineering, definitely something I will be looking into also. Interesting!

Yup this is another one I want to master.

This thread is nearly stressing me now, so many things I want to master.

(Oct 18, 2025 05:07 PM)Palestine Wrote: [CITE](#) def going to keep learning more about AI because as everybody knows its literally the future

Completely agree.

AI is the future for sure, learning everything about it is worth it.

Yin Yang - October 18, 2025, 10:04 pm

Don't have anything off the top of my head
