MUTM Team Statement & Tokenomics

Mutuuum Finance (MUTM) is a DeFi lending protocol still in its presale stage. It offers both a lower entry price and utility-based growth mechanics. MUTM remains at the very beginning of its lifecycle — a stage that historically offers room for percentage upside.

Thanks Stan, you the man, I'm going all in for the percentage upside :)

Nah - I will however take a look and see if there are any opportunities here

This is very interesting:

Quote:Mutuum Finance is an Ethereum-based decentralized lending and borrowing protocol designed to tie token demand directly to platform usage rather than speculation. At the core of its architecture is a dual lending market system that combines flexibility with risk management.
