Experts Warn of Widespread SonicWall VPN Compromise Impacting Over 100 Accounts

Cybersecurity company Huntress on Friday warned of "widespread compromise" of SonicWall SSL VPN devices to access multiple customer environments.

"Threat actors are authenticating into multiple accounts rapidly across compromised devices," it said. "The speed and scale of these attacks imply that the attackers appear to control valid credentials rather than brute-forcing."

A significant chunk of

I found a exploit inside a VPN that had a bug bounty and sent them a email about it

they ignored it and patched it wrong

these companies deserve this shit

Rapid access with valid credentials is much scarier than brute-force attacks. Anyone here using SonicWall VPN should definitely reset passwords, enable MFA, and review logs ASAP.

Vectura - October 22, 2025, 8:03 am

SonicWall again... credential theft seems to be the common thread lately. The scary part is how fast they're moving once they're in, shows how little time there is between compromise and full access these days.

Rsynced - October 22, 2025, 9:25 am

We used to have a sonicwall VPN back at my old office.

DAL-SHA - October 22, 2025, 1:37 pm

Credential theft at scale like this means many organizations still skip basic VPN hardening. ??
