Thread: [Phishing Website Setup](#)

DramaKing - October 22, 2025, 4:08 pm

I will setup a phishing website for social media sites, email, chat apps, etc on your domain. I have experience with using kingphisher, gophish, evilginx, SET, etc. Websites can be setup on VPS, VM, self-hosted, whatever. I can forward ports for you and do any of the technical requirements. Consultation is included.

Price: \$15 + expenses - custom pages are billed at a higher amount

Anyone looking for this - This is a steal.
Good luck with sales, price is more than fair.

The benefit to doing this repetitively is that one can automate the process to where the hourly rate is pretty decent.

You have a list of the email and chat page you currently have?

Do you know a reputable host that wont openly suspend, I have a modified version of evilginx, and gophish that would need some custom phishlets provided this is something you're willing to undertake, given its complexity I expect to spend a little more.

[RDP.Monster](#) has been a good provider. Let me know what phishlets you need.

WOW, how could I have missed your post on the forum??

In my line of work, sometimes I need the services you provide.

I subscribed.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Do you code it yourself or just clone the original?

DramaKing - February 10, 2026, 2:56 am

I use premade phishlets for the listed sites. Cloning the original would immediately trigger Safe Browsing or AV, so I don't do that.

just a middleman then.

good luck.

DramaKing - February 10, 2026, 3:03 am

Using open-source software is not being a middleman.

JulianaRamos1337 - February 16, 2026, 5:34 pm

you should create a platform like that. phish as a service. i run one and charge 200\$/month and got hundreds of paying customers. i saw you do malware too. could be another platform where its fully automated .

Thanks for the advice, but I don't want to get endgamed. PhaaS seems to be hard to find these days, so I'll remember you. I also do know about antibot.

Marketing Magician - February 16, 2026, 6:09 pm

Would you be able to provide hosting and set it up as well?

I can buy hosting and a domain for you and charge you for it, but then I will be controlling it.

IRLCash - February 22, 2026, 3:35 pm

Seems like a fair price GLWS hope you do well!
