Thread: [UnCrypt AntiDetect Downloader](#)

DramaKing - October 23, 2025, 9:21 pm

Frustrated with crypts that keep getting reversed and signed? Forget the hassle of trying to bypass Windows Defender. My unique method downloads your file, waits for it to be detected, and then runs it normally. TamperProtection is irrelevant.

Anyone who has a half-decent understanding of WD could replicate this in a few hours or so, so I'm not asking for a lot.

EXE or PS1: \$20

LNK: \$30

[contract=tid]Start Contract[/contract]

Interesting..thanks for the info....

DramaKing - January 30, 2026, 11:49 am

Disclaimer about LNK. Windows Defender now treats all shortcut files that run Command Prompt or PowerShell and possibly other LOLbins as malicious.

you say "waits for it to be detected", does this mean windows defender will still pop a notif saying thread detected?

Windows Defender does not show a notif. SecurityHealthSystray does. There are no kernel-level protections on that process.

How so?

Stanley - August 26, 2026, 8:09 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

I am looking for a tool that downloads the payload from URL.

You can change the file later to make it FUD crypt.

The downloader keeps on downloading new fresh stub periodically, if the old is deleted.

As I explained before, the file gets whitelisted. It will not be detected. The downloader is more likely to be deleted, but I can add a scheduled task to periodically check for the file.

NoAccess123 - September 12, 2026, 6:08 pm

@dramaking

i am looking for the downloader tool that can check if a latest version of payload is on URL then it would download and run the stub/payload again.

You said you have something similar, but required to add a code that checks for new version, and download the stub.

Let me know if you can do that and what would be the cost.

Tried reaching to you on your DM too.
Please let me know.

Thanks
