Thread: [If you had \\$1,000, which crypto would you invest in right now?](#)

If you suddenly had \$1,000 sitting around, what would you invest it in right now?

Which coin or project would you put it into today, and why?

Are you going for something safe like BTC/ETH, or are you taking a shot on smaller alts?

I'm genuinely curious to see what everyone's most confident pick is in this market.

Experience taught me to go through stable coins only. BTC is king, or ETH as other cryptos rely on it

My next lump sum buy will be into more Sui

Dark Skin - October 24, 2025, 10:37 pm

Can go wrong with buying some hyperliquid

Pimping - October 24, 2025, 10:41 pm

Solana since the etfs are coming soon

I think those are all the shilled tokens which will be worthless going forward.

\$1000 should be put into Bitcoin and held.

Bitcoin for safety and stability. SUI for copium.

Rixen70HD - October 27, 2025, 1:39 pm

I think BTC will always be the main king for long investment :)

TrackPro+ - October 27, 2025, 2:05 pm

I would choose \$1000 on Solana because the profit margins will be greater.

hate to say it but none , get ur money up and wait for a btc dip next year

JoshAllen - October 28, 2025, 4:44 pm

BTC. It has proven it will only go up.

Braco22 - October 29, 2025, 5:30 pm

If these \$1000 are your last, I'd not put them into anything really. We're nearing the end of the bullrun, with quite possibly hitting the final BTC top in late December or early January.

If you want to make a long-term BTC bag, which should be YOUR ONLY choice of long-term bag, then you can buy BTC at whatever price you can/want.

Personally, I am ALL about what is happening behind the curtain. I despise what is shilled on TikTok and Instagram.

I highly recommend you look into the partnerships that ChainLink has been getting and already has.. They are the backbone of tokenization and DeFi. It is basically a bet on all crypto which I believe will be multi chain, and CCIP links everything together.

Highly recommend.

PEPE & BONK, THIS NOT AN ADVICE THOUGH

Costanza - October 30, 2025, 5:50 am

Tbh don't invest a single cent. this run is 100% done people are just so oblivious on seeing it. you will lose money if you go in .

Maybe into SOL/BTC/ETH!

I love gambling memecoins on SOL but heard SOL is a good investment as well

BTC or XMR would be the play for me, one is the OG and the other is imo the better version of the OG.

vyactor - November 2, 2025, 3:59 pm

I feel like there's no going down of BTC and ETH.

Learn to trade with it

Future market will be interesting

JoshAllen - November 8, 2025, 6:30 am

BTC is the only thing I would trust.

It is the number one thing you think of when you think of "crypto"
