Thread: [OPENAI - API KEYS - Limitless ai for developers](#)

mexicannachos - October 24, 2025, 7:45 pm

im selling Openai api keys Tier 5 for heavy users/devs :)

i got level 4 anthropic keys too :)

Contact me at TG

@d33pr3d

what do a tier 5 openai key?

GPT-5 Tier 5 — Limitless AI for Developers

With a Tier 5 API key for GPT-5, your applications get OpenAI's highest performance. For example, GPT-5 on Tier 5 can handle up to 40 million tokens per minute (? 2.4 billion per hour), compared with much lower limits on lower tiers. That means heavy tasks—like large-scale document analysis, massive content generation, or many concurrent conversational agents—run without throughput bottlenecks. Tier 5 also offers priority processing for ultra-low latency and enterprise-grade uptime, ensuring quick responses even at peak demand.

Enterprise-scale throughput: Tier 5 equates to enterprise-level limits. OpenAI provides options for committed throughput and volume discounts, plus batch/async APIs to process large workloads cost-effectively. That lets you plan capacity confidently and integrate AI into high-volume production pipelines.

Advanced capabilities of GPT-5 vs lower tiers

GPT-5 is the most advanced model available for developers. It delivers state-of-the-art performance on coding and reasoning tasks, producing more accurate, coherent, and useful responses than earlier models. It supports huge context windows—enabling prompts with hundreds of thousands of tokens—so you can include long documents, full conversation history, or large knowledge bases in a single request.

New developer controls: GPT-5 introduces API parameters that let you tune behavior (for example, adjustable verbosity and reasoning effort) and offers the ability to invoke external tools and APIs from natural language prompts. This makes building complex assistants and agent workflows far easier.

Model variants for cost/performance tradeoffs: GPT-5 is available in multiple sizes (full, mini, nano). Use the full gpt-5 for maximum capability, or gpt-5-mini/gpt-5-nano for much higher throughput at lower cost—useful when volume matters more than absolute peak performance.

Benefits for teams and enterprises

Tier 5 is about more than raw performance — it includes enterprise-grade security, controls, and support. Expect features such as strong encryption, compliance options, single sign-on, and private networking options. You also get granular project and permission management so large teams can collaborate safely while controlling who can access which models and keys.

Operationally, Tier 5 customers can obtain reserved throughput, prioritized support, and SLAs—so your dev teams can deploy AI features with confidence. It's designed to scale with you: once you're at Tier 5, expanding capacity, adding throughput reservations, or negotiating volume discounts becomes straightforward.

Approximate pricing (example reference)

Model Input cost (per 1M tokens) Output cost (per 1M tokens)

GPT-5 US\$1.25 US\$10.00

GPT-5 mini US\$0.25 US\$2.00

GPT-5 nano US\$0.05 US\$0.40

Priority (faster, premium) US\$2.50 US\$20.00

Pricing is typically pay-as-you-go. Tier 5 customers often have access to better volume discounts and options (e.g., reserved throughput or batch pricing) to optimize cost for large workloads.

Combining high limits, priority processing, advanced model features, and enterprise support, GPT-5 Tier 5 gives developers and companies the platform to build AI products that are more powerful, faster, and far more scalable—unlocking projects that previously felt out of reach.

Do you have anything for GPT-5 PRO? If so I am interested

Can you explain the discounts? Is it similar to the 50% or so discount from openai for delayed or next-day processing?

<https://openai.com/api/pricing/>

With Gtp-5 pro i got azure openai keys, have sora 2.

Seeking Claude API access / API credits at highly competitive rates. Our volume is extremely high: tens of thousands of daily requests, ~3 billion tokens per day.

We require a scalable, stable, enterprise-grade setup with volume discounts, bulk credits, or long-term enterprise agreements. Only serious, long-term suppliers please message me directly.

winwinlw - August 7, 2026, 1:08 pm

Could you contact me on Telegram? I'm unable to send you a message.
