Thread: [Warp.dev - Made a mini game in under 1 minute // 1 prompt](#)

Hackers - *October 24, 2025, 8:08 pm*

I hadn't used warp before, so I took a look at it. It claims to be the perfect solution for multi-agent workflows in codebases.

Right off the bat, after email signup - I can create a new project, clone a repo, or pick a folder on my machine.

I seem to have free credits & I can prompt for what I need.

I made a mini game in 1 prompt
