New Gemini Diffusion Model Promises Text at Five Times the Speed

Google I/O unveiled Gemini Diffusion, a text diffusion model for code. It promises faster generation and better editing, potentially changing AI-native development.

I haven't messed with Gemini too much, I have been doing this thing where I test a different AI each month, this month it's perplexity and I do find myself dreading how slow the text speed can be at times.

Arap misin?

Chorozon - October 27, 2025, 3:47 am

Is it smart though ?
