Thread: [Solana ETF approved](#)

Pimping - October 27, 2025, 9:19 pm

So i read earlier Solana and other altcoin ETFs was approved in the NYSE
what are your guys thoughts on how it will affect the price of Solana? I think it will slowly help the price but not straight up moon

John Constantine - October 28, 2025, 6:40 am

Not in Solana, but I don't expect much price action. IIRC, it didnt do much when BTC and ETH got their ETFs approved.

gotthis98 - October 28, 2025, 8:26 am

Will go up in the long term for sure, we already have feedback about btc etf

Costanza - October 28, 2025, 8:29 am

Crazy how hbar got accepted before ada . fml

Omniscient - October 28, 2025, 12:26 pm

It will be a dead ETF.

Looks like Bitwise is doing it.

I bet it gets 1-5% of Bitcoin's ETF. Let's keep this thread alive for the data.

ADA is absolutely dead. Great tech, terrible team.

HBAR does nothing other projects cant do better.

The key difference is HBAR only has hype and ADA only has tech. You need both to be successful long term. You only need hype to be successful short term.

I think a great ETF would be the top 15 speculative coins excluding BTC and ETH.
