Thread: [Are there any proven methods to make \\$20/day for long term ?](#)

JNath - October 28, 2025, 2:55 pm

I used to make money with e-whoring few months ago but recently I'm having problem making the sales maybe due to onlyfans being mainstream. I was wondering are there any blackhat/whitehat methods to make at least \$20/day.

I don't mind learning any skill whether it's coding or something else as I have some savings so I can learn something while it lasts.

Tbh I'd like something which involves work and has less probability of losing money lol.

That's cool, honestly I don't have a huge goal. I just wanna make \$600-\$700/month and that would suffice me.

You can review the service I offer or play a game of chance. Earn \$20 a day with low risk.

Check out my signature... If you have 10-30 mins sparetime each day try my method!
I've earned abt 300\$+ so far.

Its where you download apps, reach a certain level and get paid.

Take 2 years of your life to hoard certificates and then get on a career path. Don't waste time with hustles. The vast majority of youtube videos are in some way educational or infotainment videos. That's why I suggest you go get certificates, at the very least you will be able to produce youtube videos and build a personal brand.

These are my 2 cents.
