Thread: [X-MAILER V2.5 - THE ULTIMATE MAILING TOOL Half-price resale.](#)

sprintccfuture - October 28, 2025, 9:29 pm

High Quality Software Licenses for Resale – Lifetime Access, 50% Discount

1. Transport Layer Security

TLS/SSL encryption for SMTP connections.

Protects email content during transit from interception or eavesdropping.

Ensures secure communication between sender and recipient mail servers.

2. URL Encoding Protection

Supports multi-level URL encoding (0–3 levels).

Prevents tampering and enhances tracking.

May be used to bypass phishing detection by obfuscating URLs.

3. Multi-SMTP Rotation

Auto-rotates across multiple SMTP servers.

Helps bypass rate limits, blacklisting, or spam filters.

Has a failover mechanism for continuous delivery even if one SMTP fails.

4. Attachment Security

Customizable attachment naming for stealth.

Supports HTML attachments with embedded tracking.

Can generate PDFs for secure delivery.

5. Link Obfuscation

Uses Base64, URL encoding, and more to mask links.

JavaScript-based redirection and QR code generation for privacy or anti-detection.

? Functional Capabilities

CategoryFeatures
