Thread: [FUD EDR/WD/SmartScreen bypass via Win+R ClickFix + HTML-LNK](#)

Basilisk - October 29, 2025, 5:12 pm

? Impact Solutions EDR Edition: The Ultimate Stealth Exploit Builder ?

? Unleash Unstoppable Delivery Methods for Elite Professionals ?

Introducing Impact Solutions EDR Edition — the market's most reliable and undetectable exploit delivery builder, crafted for those who demand perfection. ? This powerhouse tool guarantees seamless bypasses of ALL major AVs and EDRs, rigorously tested and fine-tuned for weeks to eliminate PowerShell pop-ups, detectable traces, or any red flags. If you operate with zero margin for error, this is your game-changer. ?

? Two Elite Delivery Methods ?HTML + .LNK: Seamless social engineering with embedded payloads. [\[Watch Demo\]](#)

Win+R (ClickFix): Instant, traceless execution via Run dialog. [\[Watch Demo\]](#)

? Live EDR Bypass Proofs ?

HTML Method Bypasses:[Windows Defender](#) | [Kaspersky EDR](#) | [ESET EDR](#)
[Trellix](#) | [SentinelOne](#) | [Harmony](#)
[FortiNet](#) | [BitDefender](#)

ClickFix Method Bypasses:[Windows Defender](#) | [Kaspersky EDR](#) | [Trellix](#)
[SentinelOne](#) | [Harmony](#) | [FortiNet](#)
[ESET EDR](#) | [BitDefender](#)

? Game-Changing Features ?Universal EDR & Windows Defender Bypass: Evade every major endpoint protection with ease.

SmartScreen Sidestep: No costly EV certificates needed.

Elite Support: 24/7 [Telegram team](#) + detailed video tutorials.

Payload Freedom: Supports .exe, .dll, .msi, and more.

Stealth Execution: Display decoy files, web pages, or message boxes.

PowerShell Flexibility: Run custom commands silently.

Persistent Payloads: Ensure startup survival.

Hidden Drops: Conceal all artifacts post-execution.

HTML Injection: Use our [.HTML > JS converter](#) for slick embeds.

Free PRO Tier Subscription Included: Every purchase unlocks full PRO access at no extra cost!

Advanced ClickFix Variant – Ultra-Stealth Mode

Note: This variation of ClickFix supports comments to hide the commands and has almost no pop-up windows.

Need Custom Features? Our dev team builds anything you envision—new templates, methods, or bespoke tools. Your license includes a dedicated crew ready to innovate. ?

? Pricing & Contact ?

1-Month License: \$3,500–\$5,000 USD (varies by customization). DM for a tailored quote.

Contact Us: [Telegram: @Basilisk7777](#)

? Terms of Service ?Evasion applies to builder-generated files only—pair with a crypted payload.

All sales final unless we can't resolve a builder issue promptly.

No sharing or cloning—violations result in a license ban.

Escrow welcomed for secure transactions.

Hackers - October 29, 2025, 7:28 pm

For your price of \$3,500 to \$5000 per month, do customers get anything else, like the full source code?

Basilisk - October 30, 2025, 1:18 am

Giving the full source code isn't on the table, not because of me.

Each buyer will receive free PRO sub to my exploits in addition to this.

Thanks for clarifying this

So just to confirm, it's \$3500-5000 per month for the LNK shortcut, and ClickFix?
Is there anything else included in this deal?

Basilisk - October 30, 2025, 7:13 am

You get access to all of my exploits, instant FUD 100% 24/7 and you will get by purchasing this particular product an EDR bypass which bypasses all major EDRs easily as shown on the videos.

Chornaya Magiya - October 30, 2025, 7:52 am

Brother for this price u should be providing source codes not a services.

Megumin1312 - October 30, 2025, 9:26 am

Just delete topic (and don't use your pc as a host) Z

hoangdoan - October 31, 2025, 4:25 pm

Great, but at this price I don't think anyone will buy it man.

This product costs top dollar for top quality

dmitribovv - November 1, 2025, 7:06 pm

Is it a file dropper?

Basilisk - November 2, 2025, 1:32 am

The whole idea of this whole forum is social engineering, without it - most of the forum won't be any good

Basilisk - November 3, 2025, 10:33 am

(Nov 3, 2025 09:18 AM)Megumin1312 Wrote: [\[CITE\]](#) He's selling a dummy, he hasn't closed his server, I've looked at his code, there's nothing interesting, usual public, there's no wd bypass, there's not even obfuscation in run.

So many nefarious accusations yet no proof at all.

Aside from the fact that we have NEVER conducted business together, I have many customers who would love to attest to the fact that what I sell is indeed private and nothing like the things you've mentioned.

I also added many videos and scans to my thread which show live proof, but I guess that's nothing when you are so determined to undermine someone.

Remember, you can always report people who are 'sales trashing' if you feel they are being negative & also aren't a contracted customer.

tope - November 6, 2025, 10:34 pm

Still win + r works well?

Basilisk - November 7, 2025, 1:37 am

(Nov 6, 2025 11:34 PM)tope Wrote: [\[CITE\]](#) Still win + r works well?

Yes, without any issues and always updated

nethoodus - February 9, 2026, 1:00 am

The video shows you're opening it as a PuTTY payload. Can you do the same with a RAT file so it doesn't show up as a clickfix?

I've seen other people's working versions, but when it came to actual working versions, Defender stopped it.

If it's not too much trouble, could you upload the result on video

DuglasLimb11 - March 16, 2026, 3:37 am

I noticed that the administration here does not care at all what the sellers post? 80-85% of the garbage in the malware thread. Some brainless Indians Turks dump how they show "scantime" and AV bypass on Putty :D
