Thread: [E-mails with access \(G-mails + Outlook bundle\)](#)

**Godofcrypto** - October 30, 2025, 2:35 pm

Hi everyone,

I'm looking to purchase a bundle of authentic-looking email accounts (Gmail or Outlook), ideally following a pattern like name + year of birth, etc. They don't necessarily need to have been used before, but they should be registered, verified, and able to send emails if needed.

I'm interested in buying anywhere between 1,000 and 10,000 email accounts.

Important: I'll remove this post right away if buying such items isn't allowed. However, I believe this request doesn't violate any rules. Thanks! ?

Anywhere between 1k and 10k will work for me. Please send PM's with your offers.

They can be fresh, they can be aged, they can be mixed, but they should be verified and able to send e-mails and look authentic (name + age pattern + random elements etc) ... Thanks! :)

Be careful of blackmailers too, there's this one guy who can't even snipe IPs properly that was spamming me saying he'd frame me & report me to the feds.  
He wanted \$500+ in XMR or else he said he'd report me to FBI yesterday ...

1000 to 3000 is very possible.  
10k+ may be a stretch to ask as I'd have 1+ source.

Contact me though  
I actively deal with accounts
