Thread: [\[JOURNEY THREAD\] Scaling my AI Girl to \\$20k/month](#)

xPlutus - October 30, 2025, 7:54 pm

- Just dropping this here as motivation for myself -

Started ewhoring when i was like 13 years old, off and on whenever i needed money. With my other stuff being fully automated now, I finally got the freedom i always wanted in life. though having entrepreneurship in my veins, i cant simply wake up and sit on my hands.

The girl I've created is fully ai (no hybrid model), I initially created a flux, sdxl and wan lora for comfy, but ive now moved to other methods for generating my sfw/nsfw content which allows me to create both pics and vids in bulk.

its not much, but its a good start imo as I'm fairly new to ai OFM.

I'm optimizing for GFE rather than selling nudes though i will sell them if a person is just there for nsfw content.

Next up for marketing is IG reels (ads) + tiktok sfw reels (organic)

FYI, i have moved away from my old reckless ewhoring behaviour which was based on very dark exploitative psychology strategies in order to make sales. as I've become older, i didn't want to be someone like that anymore. i have set certain boundaries for myself which i will simply not cross, no matter how much money i could have gotten for it. ill be instructing my chatters that as well.

Will be updating this periodically when i feel like it.

KairoExe - October 30, 2025, 8:31 pm

Nice I'm just doing the old fashion spamming reddit.

Charlie Sheen - October 30, 2025, 9:06 pm

200k rupees? This looks like \$283/month.

Pimping - October 30, 2025, 11:44 pm

Yeah seems like he worded the title wrong

looks like hes just showing his journey and updating until that point. good luck [xPlutus](#)

I have a question how are you using onlyfans or any platforms when they need ID. how do you ID verify an AI model.... i just do ewhoring but i put some twists on it and i still make good money but still work involved. looking to get into AI models i just dont know how to id verify it

Thanks!

I use fanvue. Simply signup, they will ask are you a human or ai creator. Make sure to select AI. Then you simply verify the account with your own identification and all is done.

Onlyfans is a whole diff story though as you have to tell them the ppv is AI, so for OF it would be better to have a hybrid model.

A model that creates a shitton of course content for onlyfans once, they then become lazy. You will then use AI to market her and keep marketing her.

Yeah it's good and all. I thought this was a finished product when I read this and not a progress report.

I wished to develop my skill in E-Whore but I failed. Earning = 0. If someone help me, it would be much appreciated.

Dystortion - October 31, 2025, 9:29 am
I tell you what, ewhoring is some industry - people make fortunes from it.

xPlutus - October 31, 2025, 2:36 pm

whats the biggest thing youre struggling with? marketing or chatting? or both?

xPlutus - November 2, 2025, 4:33 pm
small update, fucked up my traffic so redoing that right now so basically havent driven real traffic yet.

A994 - November 3, 2025, 10:47 am
Are you interested in coaching for a % of earnings?
Guiding through the setup and everything, I know oldschool e-whoring but did that 10 years ago now just looking for a passive hobby which brings some pocket change, hmu if interested

So many options available now.

I have the hardware to be able to generate content quickly enough too.

JoshAllen - November 3, 2025, 5:47 pm

How much are you spending on advertising?

xPlutus - November 3, 2025, 6:17 pm

i believe we have talked in the past, not sure about what though exactly but i can give some small tips on consistency. you dont need any hardware anymore, no runpod, no local gpu's etc. hmu if youd like a talk

(Nov 3, 2025 06:47 PM)Josh Allen Wrote: [\[CITE\]](#) How much are you spending on advertising? currently \$0 as i gotta just gotta ramp up my content generation to handle more marketing. should be done in a day or two probably

RiveR29 - December 3, 2025, 9:48 pm

Interesting to see where you get with this.

I hope you will make bread with this. Good luck in your journey.

Kont - December 4, 2025, 9:48 am

That's a very much modern approach, I think you're going to make much more if you keep focusing.

jellyhat - December 5, 2025, 6:45 pm

which ai models you use for generating nsfw? are you using one or a combo, which are top 3?

RangoWorld - December 5, 2025, 11:53 pm

Do you tell your customers that the person is not actually a person but AI?

What platform are you using to sell this?

SophieLF - December 7, 2025, 11:59 pm

Awesome stuff, good luck!

From the little I've looked into it you get banned from a lot of places if you don't. A lot of guys apparently don't read the fine print or don't care.

This is impressive, I tried to create an AI model as well but I think I gave the goods away too fast...

Got the Twitter account pretty much nuked for engagement, but inspired to try again another day..

All the AI video stuff is getting really GOOD

it is for sure! unfortunately had a few setbacks in my personal life so had to put this on a halt, but actually started everything again a couple f days ago. Z-image base model just released yesterday and im in the middle of training the lora.

regarding the videos, it still baffles me what we can do with a singular image. kling motion 2.6 is a total game-changer.

will update this post once i get traction again

I've been seeing the images coming out of Z-Image, I really gotta start learning how to utilize comfyui >_<

Good luck!!
