Thread: [Snow betting for this year?](#)

Do you guys enjoy white snowy days?

Do you think we gonna see any white this year?

I live in a pretty hot country but we've seen some snow the last few years, hope we get the chance with 2026 again

It depends on the odds. Is the snow the underdog?

In my place yeah. We always bet on the underdog

I hate Snow and cold weathers ..

Hate the short cold days where the nature is dead and the sun sets down early and the long nights ..

Summer Vibes FTW ..

We get snow every year. Really depends how much.

Never snows here , just snowed once in my life before

I've never really experienced heavy snow, but it always looks peaceful and refreshing. Would love to see one someday, even if just for a day or two.

Snowy weathers are like just for the holidays and weekends , a couple of weekends as days off with the loved ones or alone it doesn't matter .. Not as permanent thing where some 1 lives ..

Good question I wanna believe there will be more snow days this year than recently but knowing how it's been we could have very little snow again. But I do enjoy snow for the most part just aside from having to clean it all up

For real, I hope it snows again. When it does, I'm just gonna hang out and do nothing, like an 80-year-old just relaxing.

I love the snow but its such a hassle dealing with it all

especially where i live in upstate NY we seem to get the most snow.... so not fun but i love the look of it and especially at nighttime
