I am planning on buying some tech stuff and maybe a computer upgrade
what about you guys?

DramaKing - November 2, 2025, 2:33 am

Not sure, but my parents will finally be buying a new TV that I recommended after theirs had the backlight die. The other hand-me-down that they use in the interim is also pretty old and has horrible speakers.

Do you have a monitor in mind?

MaplePatriot17 - November 2, 2025, 6:44 am

Well, I need a TV for my new place. I'm also looking at building a server to run Plex off of rather than paying a seedbox every month.

I just recently got a new TV so I might not need anything really, and I remember years ago I'd religiously camp out overnight for tvs and other valuable electronics lol
