North Korean Hackers Lure Defense Engineers With Fake Jobs to Steal Drone Secrets

Threat actors with ties to North Korea have been attributed to a new wave of attacks targeting European companies active in the defense industry as part of a long-running campaign known as Operation Dream Job.

"Some of these [companies] are heavily involved in the unmanned aerial vehicle (UAV) sector, suggesting that the operation may be linked to North Korea's current efforts to scale up its

Using fake job offers to pull engineers into stealing drone secrets? Evil

RangoWorld - November 5, 2025, 6:23 am

Lmao. This reads so funny.
