I'd be interested in vouching for your service. Are these real followers and if so what's their main

location? Also, are they suited to a particular niche.

These are high-quality bot accounts designed to look real - they have profile pictures, bios, and some posts. They're not actual active users though.

Location is mixed/worldwide, mostly US/EU based accounts from what I've seen in testing.

As for niche - they're general purpose followers, not targeted to any specific niche. They work well for boosting social proof and making your account look more established, but they won't engage with your content beyond the initial follow.

Alright, thanks for replying.

In that case, could I please just get around 100 likes for a Insta account.

Interested.

I'll take followers and will leave a vouch review.

? VOUCH FOR THE SELLER AND SERVICE ?

? EDIT: Since the time of writing 5 days ago, I've lost all followers from my vouch.

Was to receive 100 followers as a vouch review, took a total of just under 2 hours time for fulfillment. First round only received 29/100 and 3 dropped off, but the seller sent another 100 which I got seemingly got 100/100 of, making a total of around ~126 followers gained. The first 29 followers were mostly Indian accounts. The next batch of ~100 was a mix, however, most of which seemed to be "legitimate" US-based accounts some were even businesses.

Can't speak on the 30D "refill", but I'd hope for the most part they stick - I'm aware some are bound to drop off, time will tell.

Thanks for the followers. Best of luck with the service and sales. ?
