Thread: [Remote Desktop Tool Like Dark Comet](#)

bilalsidd43 - November 6, 2025, 5:49 am

Anyone know of any remote desktop tools like dark comet that are free and available to download? even paid!?

DramaKing - November 6, 2025, 6:27 am

DarkComet is quite old now. Pulsar RAT is the new hotness (for free RATs).

Dark comet was made in 2008 which is crazy to think about.

Doesn't feel like 17 years ago but still. Hearing that in 2025 gives me whiplash

Pulsar is probably your best bet.

That just aged me soo much, I remember when it was just being Dev'd and Cybergate being good af. Wonder what ever happen to Johnny the Cybergate dev. Miss his old forum.

Oh this reminds me of so many good memories from the past. When darkcomet posts ruled the rats section.
