LP-Free Perpetuals Exchange Leverup Available Now, Powered By Monad

LeverUp is a next-generation DeFi platform built on the layer-1 blockchain Monad. LeverUp delivers a decentralized trading experience with uncapped open interest, free liquidity provider perpetuals, and scalability. The platform is designed to promote a more transparent and balanced trading environment.

Can anyone explain to me how this company will make money? All I see is a lot of zero % fees and confused how this company can grow.

Vectura - November 8, 2025, 5:18 pm

Interesting move. Free perpetuals with leverage sounds tempting, but the risks jump up quickly when leverage hits. Good to see fresh exchanges like LeverUp powered by Monad trying something new but anyone diving in should know: read the fine print and understand how margin + liquidation works.
