Logo Design Request: Tablino - Restaurant Ordering Platform

About the Project

Tablino is a modern SaaS platform that empowers restaurants with comprehensive digital ordering solutions. We provide restaurants with:

- Online ordering websites for delivery and pickup
- QR-code table ordering for in-restaurant dining
- Complete management dashboard for orders, menus, payments, and analytics

We're helping restaurants modernize their operations and provide seamless ordering experiences for their customers.

What We Need

A professional, memorable logo for Tablino that represents digital innovation in the food service industry.

Brand Values

- Modern and tech-forward
- Professional and trustworthy
- Clean and approachable
- Efficient and reliable

Style Preferences

- Clean, modern design
- Professional (B2B SaaS aesthetic)
- Should work well in digital contexts (dashboards, web apps, mobile)
- Scalable from favicon size to large headers

Existing Brand Elements

- Primary Color: Blue (#3178C6) - TypeScript blue
- Custom Typography: Tablino Sans (we have custom fonts, but the logo can incorporate its own lettering)
- Background: Typically used on white backgrounds

Logo Requirements

- Must include the name "Tablino"
- Should work in both full color and monochrome versions
- Need responsive versions (full logo + icon-only variant for mobile/favicon)

- File formats: SVG, PNG (transparent), and source files

What We're Looking For

The logo should convey a sense of:

- Digital innovation meeting hospitality
- Restaurant/food service industry (subtle, not overly literal)
- Efficiency and modern technology
- Professional SaaS platform
