Thread: [C# / VB.NET App Designer for New Project - \\$400/Rev Share](#)

jmark7 - November 8, 2025, 8:10 pm

Hello everyone,

I am initiating a new software project and am actively looking for a skilled app designer/developer proficient in either C# or VB.NET to join me as a partner.

Who I'm Looking For: Someone with strong experience in C# or VB.NET development, especially with a good eye for application design and user experience (UI/UX).

A proactive individual who is ready to take ownership of the development process.

Someone looking for a long-term partnership and is willing to grow with the project.

Reliable, communicative, and passionate about building great software.

Must be comfortable working on projects that may operate in the 'grey hat' area

Please reply to this post or send me a private message with:
A brief introduction and your experience with C# or VB.NET.

Your portfolio or examples of past app design work.

Your Telegram (TG) handle for quick communication.

Looking forward to building something great together!
