Did you get a response from the seller? I would like some more information about how this works as well and does it come with analytics?

its very easy, you delegate us the account as contributor (no pw access, no risk) and we will run the bot to run replies for you, each reply is relevant to each post,m using the latest AI and we have fed it millions of tweets to analyse. i am not in forums often so in case im not responsive here my telegram is @francdotexe
