Thread: [Advanced Evasion: AV, Smartscreen via ClickFix, Html smuggling](#)

malcomx777 - November 10, 2025, 10:57 am

Silent Execution: Operate Under the Radar?

? Cutting edge Delivery Methods ?

These templates ensure smooth bypassing of all major AV and EDR solutions, or any detection triggers. If you're looking for out of the box delivery methods, this is for you.

? Delivery Methods ?Win+R (ClickFix): Instant, traceless execution via Run dialog.

File Explorer (ClickFlix): HTML Smuggling and other tricks

DLL Sideload: Abuse of legit dll by hijacking.

Word

[\[Watch Demo\]](#)

File Explorer

[\[Watch Demo\]](#)

Captcha

[\[Watch Demo\]](#)

? Cutting edge Features ?

EDR & Windows Defender Bypass: Evade every major AV

SmartScreen bypass: No expensive EV certificates required.

PowerShell Flexibility: Run custom commands silently.

Pentesting companies?

I can setup a FUD C2 Framework similar to Cobalt Strike on a VPS. This way you'll be able to manage your machines/beacons.

Submit your project idea and let's see how I can assist you.

? Pricing & Contact ?

Source code for all Win + R templates FUD version: \$1500

Rat, C2 server and other tools setup: custom

Dll Sideloads: \$500 per stub

You do know the difference between ClickFix and FileFix, right?

OpalCanidae - November 10, 2025, 11:08 am

500/2000 seems extremely steep for this

Uh, glws? I guess?

malcomx777 - November 10, 2025, 11:11 am

(Nov 10, 2025 12:08 PM)OpalCanidae Wrote: [\[CITE\]](#) 500/2000 for a screen most anyone would know not to listen too and a few lines of code that could be generated by AI for free?

Might wanna check your pricing there just a tad.

Uh, glws? I guess?

AI can generate FUD dll sideloadings now? lol

I'll take your pricing comment into account, but please do not discredit my work

That was maybe a bit harsh, I stand by the pricing comments though.

My comment was talking about the screen that just walks people through installing with win+r which was admittedly reductive.

Sorry bout' that.

Even with win+r the payload needs to be FUD. I give a FUD method with it, which allows to save a lot of bucks on crypts in the long run. Otherwise, I'd agree it would have been very simple and expensive.

So you are saying your winr method is pre included with crypter that u say crypter is not required ?
If it is elaborate more how u achieved this ?

MeW11 - November 10, 2025, 12:21 pm

any vouch copies

will leave a detailed review

malcomx777 - November 10, 2025, 12:55 pm

.bat file is not good enough explanation.

Explain more so people can understand your skill level and get better decision if buy or no.

Win+R --> powershell command --> runs bat file --> runs payload (bypass WD, smartscreen, AMSI)

If you want the whole source code just say that

Chornaya Magiya - November 11, 2025, 5:37 am

Haha sure i would take vouch copy ?

Sticky Bot - November 11, 2025, 10:29 am

Hi, I'm Sticky Bot. The owner of this thread has purchased a Paid Sticky. Hack Forums does not get involved in deals or deal disputes. We do not vouch for the product or the service offered by members. Please note that all deals are at your own risk. The sticky will expire on Nov 18, 2025. If you or a loved one are interested in buying a sticky please visit this page: [Buy Sticky](#). For more information about Paid Stickies you can read our [Help Doc](#).
