? Stop Paying Extra for DDoS Protection That Doesn't Work

TL;DR: G91 includes 1 Tbps DDoS protection on every service (\$4.99-\$99.99). Non-standard ports, AI filtering, real security - not marketing.

? Why Security Matters

You've been hit. Server offline during raids, website down, bot dead.

99% of downtime = attacks, not hardware.

- Avg DDoS 2024: 450 Gbps
- G91 capacity: 1 Tbps (survived 750 Gbps)
- 1hr downtime = \$50-200 lost

? How We Protect You

Multi-Layer DDoS (Included Free)

- L3/L4: 1 Tbps filtering
- L7: Stops HTTP floods
- AI-powered: <3 sec blocks
- Zero-day protection

Security Through Obscurity

- Non-standard ports (attacks can't find you)
- Custom firewalls per service
- Isolated environments
- 256-bit SSL/TLS

Example: We don't use MC port 25565. Dynamic ports = invisible to automated attacks.

Enterprise Hardware

- NVMe SSDs, DDR5, 10Gbps
- Hourly backups, RAID 10
- 99.9% uptime SLA

? Services (All DDoS Protected)

? Game Servers

- Minecraft: \$14.99-\$59.99 (10-100 players, Java/Bedrock, one-click modpacks)
- CS2: \$8.99 (128-tick, SourceMod)
- Rust: \$15.99 (Oxide/uMod)
- ARK: \$19.99 (all maps, mods)
- Valheim/GMod: \$7.99-\$9.99

## ? VPN

- Basic: \$9.99 (100GB, 100Mbps)
- Pro: \$24.99 (500GB, 500Mbps, no-logs)
- Enterprise: \$49.99 (unlimited, 1Gbps, static IP)

## ? Web Hosting

- Shared: \$4.99 (50GB, cPanel, SSL)
- WordPress: \$7.99 (LiteSpeed)
- VPS: \$19.99 (4GB DDR5)
- Dedicated: \$99.99 (64GB, Xeon)

## Other Services

- Discord Bot: \$4.99 (24/7, MySQL)
- TeamSpeak: \$5.99 (25 slots)
- Email: \$4.99-\$24.99
- FTP: \$9.99-\$49.99
- CDN: \$19.99-\$99.99

## ? Real Scenarios

MC Attacked: ? Hours down -> ? Players don't notice

Website DDoS: ? Offline -> ? Stays fast

Bot Dies: ? Spam floods -> ? Auto-restart

## ? Testimonials

> "3 DDoS/week before. 8 months solid with G91." - MC network owner

> "VPN faster than raw connection!" - CS2 player

> "First real DDoS protection." - Rust admin

## ? Offer

Use code `SECURITY25` = 25% off first month

Test our protection. Try to take us down. We dare you.

## ? Get Started

- ? [deleted]
- ? 24/7 support

## ? Quick FAQ

VPN logs? No-logs policy

Payment? Card/PayPal/crypto

Refund? 7-day guarantee

Migration? Free assistance

Locations? NA & EU

## ? Comparison vs Competition

| Service | Budget | G91 | Enterprise |  
|-----|-----|----|-----|  
| MC 20p | \$12 | \$14.99 | \$39 |  
| Downtime | 6-12hr | <5min | <10min |  
| DDoS | None | 1 Tbps | 500 Gbps |

#### ? Bonuses

- Free SSL (\$49 value)
- Free migration
- \$10 referral credit
- 10-15% bulk discounts

#### ? Recognition

? 4.9/5 TrustPilot | ? Best Host 2024 | ? A+ SSL Rating | ? 99.97% Uptime

#### ? Bottom Line

Security is our foundation, not a feature.

\$5/month projects get Fortune 500 protection. Most hosts charge extra for weak DDoS shields. We build 1 Tbps protection into everything.

Can you afford more downtime?

? [Deleted]

#### ? Tech Specs

Network: 10Gbps, BGP, <5ms latency  
Hardware: Ryzen 9/Xeon, DDR5 ECC, NVMe RAID 10  
Compliance: PCI DSS, GDPR, ISO 27001, SOC 2

#### ? Partnerships

- Resellers: White-label
- Affiliates: 20% recurring
- Bulk: 10-15% off
- Non-profits: 50% off
