Thread: [Global Cellphone Number OSINT Guide](#)

Clumsy - November 13, 2025, 4:47 am

Step 1 - Verify and Analyze the Number

Begin by validating the number's format, country, carrier, line type, and geolocation to sharpen your focus.

1. Number Verification

Tool - Numverify API (free tier)

API - https://api.numverify.com/validate?number=+12345678901&access_key=YOUR_KEY

Returns - Country, carrier, line type (mobile/VoIP/landline), city/region

URL - <https://www.numverify.com>

Tool - Libphonenumber (Google's open-source library)

Install - pip install phonenumbers

Script -

```
import phonenumbers
from phonenumbers import geocoder, carrier
num = phonenumbers.parse("+12345678901")
print(geocoder.description_for_number(num, "en"))
print(carrier.name_for_number(num, "en"))
```

Returns - Country, region, carrier

URL - <https://github.com/daviddrysdale/python-phonenumbers>

Manual - Check country code (+1 US, +44 UK, +91 IN) via <https://www.countrycallingcodes.com>

2. Carrier Identification

Tool - Twilio Lookup API (free trial)

Script -

```
from twilio.rest import Client
client = Client("account_sid", "auth_token")
phone =
```

```
client.lookups.v2.phone_numbers("+12345678901").fetch(fields="carrier,line_type_intelligence")
print(phone.carrier, phone.line_type_intelligence)
```

Returns - Carrier, line type, porting status

URL - <https://www.twilio.com>

Free Tools -

FreeCarrierLookup (US/Canada) - <https://www.freecarrierlookup.com>

MyCarrierLookup (global) - <https://www.mycarrierlookup.com>

Returns - Carrier, SMS gateway, region

3. Burner and VoIP Detection

Tool - NumSpy (disposable number database)

Search - First 6-7 digits to flag VoIP (Google Voice, TextNow, Burner)

URL - <https://numspy.io>

Tool - Hiya API

Checks - Fraud risk, VoIP status, reputation score

URL - <https://www.hiya.com>

Manual - Cross-check prefixes with VoIP lists at <https://www.voip-info.org>

4. Geolocation

Tool - Melissa Global Phone Check

Returns - City, state, country, coordinates

URL - <https://lookups.melissa.com>

Tool - OpenCellID (cell tower lookup)

API - <https://opencellid.org/#api>

Returns - Approximate location via MCC/MNC

URL - <https://www.opencellid.org>

Manual - Area code lookup for US/CA (e.g., 212 = NYC) via <https://www.allareacodes.com>
