Thread: [Looking for a Developer to Build a Telegram Bot for Ad Automation \(200-300 Groups, 20](#)

secondsprint - November 13, 2025, 12:36 pm

Hi everyone,

I'm looking for a developer(s) to help build a custom Telegram bot. There are plenty of bots out there, but I want my own personalized version because I'm heavily involved on Telegram.

What I need:

A bot that sends & join my ads to 200-300 groups using 20-30 accounts.

The goal is to create a monopoly in Telegram groups with different ads for the same products.

Since there's a lot of competition, one of my ads needs to pop up every 5 seconds.

What I expect:

The developer should also think ahead and suggest features to make sure my accounts don't get banned daily (while staying within Telegram's rules).

The bot should have all the necessary features that a bot needs, and be very user-friendly, so even someone with little computer knowledge can manage it easily.

Additional details:

Only message me if you can start working on it right away, as I'm not interested in delays or slow responses.

I'm also looking for someone to manage and maintain the bot for me regularly.

Budget for this project: \$500-\$1500 for the bot development.

The bot must be easy to use, with the ability to send photos and videos as part of the ads.

Send your tg by PM. (timewasters & scammers) dont waste my time please! we work by contract!

Thanx for reading,
[contract=tid]Start Contract[/contract]

Budget is way too low.

secondsprint - November 13, 2025, 12:43 pm

(Nov 13, 2025 01:40 PM)NERO Wrote: [\[CITE\]](#) Budget is way too low.
i dont think so.

i've hired someone before for my old bot. he created it for 200 dollar.

and i could spam 200-300 groups easy. but only with 2 accounts.
and it was just python script.

we can always negotiate about price. its just need to be worth my money.

Just because someone has agreed to lower their prices doesn't mean the price is fair.

for the script he created, i think its fair

(i change the budget in the post)

RoadHouse - November 13, 2025, 1:51 pm

If you can pay 3k i might do it because ive made something similar for Twitch followers

NERO - November 13, 2025, 2:07 pm

I mean \$1.5k is probably around the right price for something like this, Im gonna take a look at it anyways.

SAT_1 - November 13, 2025, 2:41 pm

I can develop using any language you want. Send a DM.

Cyber Products - November 13, 2025, 3:03 pm

am fully capable of developing this project for you. My fee for the complete BOT is \$1,250, which includes additional features I provide, such as an admin panel, detailed statistics, ad management, and other enhancements. I have extensive experience creating Telegram bots, having developed many many many telegram bots projects over the past few years.

You can start a contract, and I will begin work immediately. Payment can be made after successful completion of the project.

RoadHouse - November 13, 2025, 3:19 pm

let wait someone maybe will bid on 1000\$, then other to 800\$ and OP will get to wanted number of 200-300\$;)

for me quality is important, if im happy price doesnt matter bro.

NERO - November 14, 2025, 9:37 am

The user is serious about it in my opinion,

He wanted to use a MM with me, I think given the fact id have expenses during the project and my previous history, A MM isn't really needed, He was adamant and i'd rather not work and then get paid,

Guess the job is up for grabs for someone else!

Good luck to all

KyleTheXyle - November 14, 2025, 11:33 am

If you still need this i am able to help out.

my telegram > ptxgun

itsmejames7 - November 15, 2025, 12:56 pm

Let be straight forward, I am new to this platform but I've ~7 years of experience as a software developer. I can show you project(s) (i.e. telegram bots) which i created solely, DM me if you are still looking for someone.

secondsprint - November 16, 2025, 5:53 pm

What I'm looking for needs to provide real value for the money — not just a simple Python script like the ones 99% of advertisers on Telegram are already using.

The system must be easy to manage, simple to replace, and designed for a smooth workflow. Everything should be displayed clearly and intuitively.

Since a large number of accounts need to be managed and monitored, it's important that the entire platform is clean, well-organized, and extremely easy to use and control.

I've already been contacted by several people, but even individuals with a so-called "high reputation" tried to sell me bullshit and make quick money. That's exactly what I'm trying to avoid. I need someone who can genuinely deliver what I'm looking for.

It's important that the developer truly understands what I want to achieve with this bot. I know it's possible to build this for a fair and reasonable price — but many people rush their work, and that is absolutely not what I'm looking for

i hope i can find someone asap. ^^^^^

Hackers - November 17, 2025, 8:04 pm

It sounds like what you're looking for is more advanced than just a python bot script

For the record I didn't use AI to write this up. This is my dayjob, I do this shit all day for years, build systems. So here are my thoughts

This is how I would sys arch the project:

- Web panel or GUI software
- Screen for managing ads (support full Telegram message object, image, menu, etc)
- Screen for managing bots / accounts (yours)
- Screen for managing target groups/chats
- Backend code can connect to TG for custom functionality, connecting to the database for

ad/bot/target settings

How you manage the relationships & ads depends on how automated you want it versus how manual

Based on your decisions, you'd have something like this if you wanted full control:

- Campaigns: ad frequency settings, target groups/chats, and assigned bots/accounts
- Start/stop/pause campaigns
- Analytics / data, message replies from campaigns, etc

One thing also that you might want is to message users who accept messages from people in their groups, so you can join groups and send messages directly too

There are a few different ways to handle the whole system depending on your final requirements... But this is what I imagine you're wanting. A business suite for your ad campaigns via TG bots

Are you looking for something like that? I've built a lot of "systems" before and these types of features for you to actually manage long-term seem like the best way for you to run your business (which is not just a singlefile python script).

Unfortunately I'm unavailable for anything under \$2,500 and I don't even know your final requirements to give you a set price. However, I hope what I wrote above maybe helps move this thread along.

mohamad123d7 - November 23, 2025, 2:22 am

Hello,

I checked your project details carefully, and I can confidently deliver exactly what you're asking for — a fully custom Telegram bot that manages 20–30 accounts, posts your ads to 200–300 groups, and maintains a constant presence every few seconds, while minimizing the risk of bans.

Here's what I will provide for you for \$600:

- ? Custom-built Telegram bot designed specifically for your workflow
- ? Ability to send ads (text, photos, videos) to 200–300 groups
- ? Multi-account system supporting 20–30 Telegram accounts
- ? Smart scheduling so your ads appear every 5 seconds without triggering spam detection
- ? Built-in anti-ban protections and behavior simulation to stay within Telegram limits
- ? Full dashboard (easy & user-friendly) so anyone can manage it
- ? Advanced features on request (auto-join groups, rotating accounts, message templates, etc.)
- ? Free installation + setup on your server/VPS
- ? One month of maintenance and updates after delivery
- ? Fast delivery — I can start immediately

I take projects seriously and work only under a clear contract to ensure safety and transparency.

If you want high quality, fast delivery, and long-term support — I'm ready to start now.

Send me your Telegram and we can begin.
