Thread: [Good browser extensions](#)

erchan - November 15, 2025, 10:11 am

Me personally i use firefox with ublock origin, useragent switcher (for when a website "wont work on your device"), and tamper monkey for general use (its really helpful in some cases)

Also extensions i use for youtube are sponsorblock which works suprisingly well for blocking sponsors, and dearow which tries to get rid of clickbait. (ublock origin also works on yt)

Hope i helped some of you, and if anyone has good browser exts feel free to share them here :D
