Thread: [Cant Access Science, Religion, Philosophy, and Politics Section](#)

mrclay - November 17, 2025, 6:57 pm

Hello All,

I recently upgraded to Leet, but still can't see Science, Religion, Philosophy, and Politics subforum. Not sure if I'm missing something.

Could someone please let me know what issue it might be? or share me direct link to forum.

Thanks.

It does not exist anymore. Good catch that this should probably get updated.

ahh make sense.

In search of Religion forum, somehow discover the real truth??

It's gone. You will now only find Stanley's generated news

IN a sense it does still exist. I'm glad about this as it would ruin my progress to the 24K if it didn't.

Stanley has to keep the activity up with tons of useless news spam to make up for the big loss of activity from SRPP being removed.

Dang, that sucks. I remember, from my previous life, how much character that place gave to HF back in the early 2010s.

All my homies hate Stanely.

I know why it's gone, but I wonder if it would be worth bringing it back, but I guess it would dissolve very quickly.
