Thread: [LTC to hit \\$100 again \(Make money with LTC this November\)](#)

Replace - November 19, 2025, 5:40 am

Made a quick couple of grands putting into LTC this November. From \$86, sold at \$96 each, again, brought at \$94 and sold at \$105, and again brought at \$102 and sold at \$109 (safe trading making \$8-10 each coin) and now brought again at \$93 and looking to sell at \$100 which will hit by Saturday.

Just to let everyone know, everyone is pumping and dumping and cashing out in LTC the profit so every Friday/Saturday/Sunday/Monday the price surge to \$100+ to \$115 which is awesome to make money and again over Tuesday to Friday they dip and buy other coins and kill LTC by then.

EDIT:

BUY TIME : Wednesday/Thursday/Friday (Max Late)

SELL TIME : Friday (Night)/Saturday (Good Profit)/Sunday(Might Dip Again)/Monday(Sell at any cost even if you make \$1-2 profit on each coin or you'll lose the wave!

How much have you made with this strategy if you do not mind sharing? I have some LTC that I bought earlier this year but right now my numbers are down and just waiting for things to pick back up

Time is hot now, its \$87,56 now so put in 1K and you'll make \$200 by Sunday/Monday

Why do you spot trade? Just go with future trading. I wouldn't put a \$1000 but if you really think it'll go back to \$100, you can just 20x leverage on a long buy and probably get around 200% back.

But if you got the balls, that \$1000 could turn into \$4000.

but future eats a lot of funds even with just \$1 dip, it will eat \$100 up for that

Matukas19 - November 20, 2025, 5:38 pm

i did it and it worked
