Thread: [Whats wrong with attachements](#)

So I did not know where else to go ask this but I tried to put an attachement to a thread that I was making but I cant "sell" it for les than 100Bytes ?

But some people can sell them for 10 or 15bytes? Is there somekind of limit to the size or?

At one point it was 10 bytes, then increased to 250 bytes, then dropped to 100 bytes for attachments.
