What is your goto device for browsing the internet? Are you a mobile device type of person? Maybe a laptop is more your preference? Where are all my desktop users? If a tablet is your thing, let us know!

Desktop.

Phone is an accessory of mine but it is bitched into submission, I don't rice it, but I don't let things scream at me with notifications either

Desktop calls me in my dreams. Morning piss? Nah, turn on the PC.

Primarily my phone if I'm being honest. I have a laptop and a PC, but they serve their own specific needs.
