? Selling My Automated Upgrade Service

I am selling my automated upgrade service to focus on larger projects. Due to my busy schedule, I can no longer personally manage this project, which has been very profitable over the past few years.

What is Included:

The Service: An automated upgrade service for various platforms.

Scripts: All necessary scripts to run the service.

Stock: Current operational stock, as well as the script required to acquire new stock.

Web Presence: The service website and Telegram bot.

Operation and Investment:

This service requires no further investment other than maintaining a Virtual Private Server (VPS) to run the scripts. Once the scripts are deployed on a VPS, the service is ready to go.

Supported Platforms (Automated Upgrade Service):

Netflix (low rate)

Xbox (low rate)

Disney Plus

Hayu

Calm

Apple TV

Amazon Prime

Discovery Plus

Note on Other Platforms: Scripts are included that can potentially source upgrades for Netflix and Xbox, but these have a currently lower success rate.

Important Notice:

I am selling the entire project. The sale does not include the current domain or existing customer data, though we can discuss including them if you wish.
