Thread: [I'm buying a spread method for: imgur links \(it's malware!\)](#)

True Alien - November 29, 2025, 11:43 am

I'm looking for a way to spread imgur.com images (it's actually malware)

How can I spread a link to a .png? / what should I call it and post where?

I'll buy your method for BTC spending up to \$100 for this. Thanks in advance! ?

What's your contact info?

DramaKing - November 29, 2025, 4:51 pm

imgur.com only hosts images, not malware. Your budget is only 1/100th of what you would actually need or less.

jmark7 - November 29, 2025, 8:17 pm

Whats your tg ID,
I can get you millions of visitors on your link.

Adult niche. X bots, reddit and kik bots.

My take, scrape kik usernames from adult websites and auto DM them to trade pics with your img link. Can scale fast and should have very high conversion.

DramaKing - November 30, 2025, 1:39 am

Pixload is probably the closest that you'll get to this. Not sure how to use it.

Can you give any website names? Seems AI has shut me out from finding anything on Google, or even duckduckgo! :L

you can get something like BRand2Social to get auto posting made over social media, there is even

cheaper tools over other website without account limitation and all so select what you want to use to spread like: a fake girl page, cheats page, hack pages whatever! Get some media made and get sheduler set to auto post, auto dm and accept people, auto answer pv message and lets spread the joy au AI mode ;)
