Thread: [3 SPOTS UBER EATS DISCOUNT BOT](#)

temno - December 1, 2025, 5:33 pm

This is not your typical Uber Eats method. This is for those ahead of the game. Traditionally, we had to use emulators and bypasses to gain discounts on UE. But after a recent patch, everything was not working. That was until we created emulation bots. These bots will automate everything for you and get you the cheapest possible discounts for Uber Eats. When you purchase this, you will gain access to the main Discord server.

INFORMATION

The bot can do address swaps if your address or IP is banned

The bot will purchase uber accounts for you so you do not have to create your own.

The discounts are not random and every account you purchase is assigned to a discount

WHAT IM OFFERING

I am offering a bot that applies promotions onto uber to get you very cheap orders.

I will teach you how to use the bots and how to set it up.

you should be able to order within 5 clicks after setting up

I will also teach you how to create virtual cards with GOOD bin

DISCOUNT TYPES

The bot offers you many discount options, which include

\$20 off \$20

\$25 off \$25

\$20 off \$25

THIS IS ALL CUSTOMIZABLE WITHIN THE BOT

Why Is This Worth IT?

This bot is what ALL buy4u discount servers use.

Only three of these bots exist. (possibly 4)

You can and WILL save lots of money with this bot

COUNTRY

US AND CANADA (uk but you have to make accounts)

TOS

NO LEAKING OR SHARING ANY OF THIS INFO.

YOU ARE NOT AUTHORIZED TO SELL THIS BOT TO ANYONE (also not possible because only mods have invite links)

I AM ASKING \$200 FOR THE BOT

YOU WILL HAVE TO PAY \$50 A MONTH TO KEEP THE BOT RUNNING

[contract=tid]Start Contract[/contract] [warn]

I already sent you a convo.... send me your discord

and what is the chance of something like this getting patched

Beaks - December 1, 2025, 5:44 pm

I am interested but would not pay upfront due to your rep and would want to host on a VPS for obvious reasons. If this is fine let me know.
